

CORE PRACTICE

Proud of our UAE origin

Infrastructure *efficiency*, practised properly.

StorTech Solutions is a system integrator and enterprise solutions architect. Storage, compute, protection, platform, network, cloud and the workplace revolve around one question: are you getting the work, the resilience and the cost you are paying for?

Office 1505, Tower B, Prime Business Center, Jumeirah Village Circle

2004

Founded in Dubai

22+ yrs

In the UAE market

500+

Deployments

99.999%

Uptime designed for

A specialist integrator, not a catalogue.

Your business moves only as fast and as safely as the technology in the office and the data centre. StorTech was founded in Dubai in 2004 to make that foundation quieter: fewer surprises, cleaner designs, and equipment that matches the work.

The practice has always sat close to infrastructure — storage first, then the compute, protection, network and cloud that have to live with it. Infrastructure efficiency is the centre. Everything else is arranged around it.

50+

Tier 1 & 2 alliances

Exabytes

Of data under protection

Hundreds

Of businesses modernised

Certified

Engineers, kept current

Eight parts. One centre.

01 · BASELINE

Assess, then design

Efficiency starts with a clear picture of what you already run. We map workloads, utilisation, risk and spend before recommending a single change.

Workshop with your team · No rip-and-replace by default

02 · COMPUTE

Right-sized compute

Servers should carry real work, not idle headroom bought “just in case”. We size rack, tower and GPU nodes to the workload and the refresh cycle.

HPE ProLiant · Dell PowerEdge · Lenovo ThinkSystem · Huawei xFusion

03 · STORAGE

Storage that earns its footprint

Enterprise storage is the centre of StorTech’s work. SAN, NAS and object are designed around the data lifecycle — not around filling shelves.

HPE Alletra · Dell storage · NetApp · Infortrend · IBM

04 · PROTECTION

Protection without a long backup window

Downtime and ransomware are efficiency problems as much as security problems. Recovery has to be fast, tested and affordable to keep.

Veeam · Dell PowerProtect · Arcserve · Wasabi · Veritas

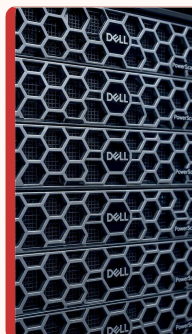

05 · PLATFORM

Density and license efficiency

Virtualisation and software licensing are where quiet waste hides. We raise useful density and stop paying for cores, sockets and subscriptions that sit idle.

VMware by Broadcom · Microsoft · Azure reserved & pay-as-you-go

06 · NETWORK

Secure paths that stay fast

A network or security stack that slows the business is not protection. We design connected, segmented access that people can actually use.

Fortinet · Cisco · Aruba · Mimecast · SentinelOne · CrowdStrike

07 · CLOUD

Hybrid cost, kept honest

Cloud is a placement decision, not a destination. We put each workload where it is cheaper and safer to run — on-prem, Azure, or a storage cloud built for backup.

Microsoft Azure · Microsoft 365 · Wasabi · Mimecast

08 · WORKPLACE

Devices and a team that stays

Efficiency reaches the desk. Business laptops, workstations and a support line that already knows your environment keep people working.

HP EliteBook · Dell Latitude · Lenovo ThinkPad · Microsoft 365

Same people, from the first visit to the floor.

01 • Understand

We assess what is running and listen to the goal before naming a product.

02 • Design

Storage, compute and recovery are drawn for continuity, without unused complexity.

03 • Stay

The engineers who designed it implement it, and stay on for support.

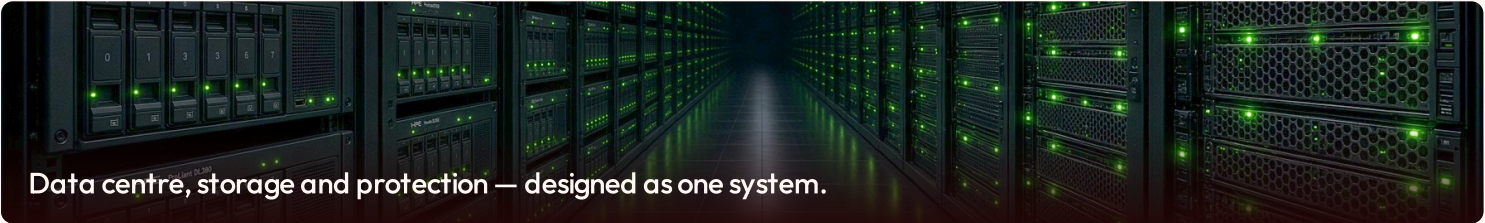

Anil Gupta
Managing Director

More than 35 years in technology, in the UAE since 1998. He leads on a simple rule: solve the problem, and stay long enough for the relationship to matter.

Proud of our UAE origin

Manish Gupta
Director, Solutions & Technology

Two decades in storage, virtualisation and backup, and more than 500 deployments. He designs for recovery time, workload fit and an environment that stays efficient.

Data centre, storage and protection — designed as one system.

“

StorTech has been a game-changer for our IT infrastructure. Their team took the time to understand our business needs and delivered a seamless integration across our systems. We’ve seen noticeable improvements in performance, security and scalability. They’re not just a service provider — they’re a strategic partner.

Abdullah Shaikh
Dubai

“

Working with StorTech was one of the best decisions we made for our digital transformation. Their expertise in ICT solutions and their proactive support helped us modernise legacy systems without disruption.

Sajith Kumar
Leading construction company, MEA

“

As a growing business, we needed an ICT partner who could scale with us. StorTech provided a robust, customised solution that aligned with our goals. Their responsiveness and customer-first approach set them apart.
